NATIONAL EDUCATION STATISTICS DATABASE, 2017

National Education Statistics Database (NESD) was set up in 2008 based on education data compiled from Address Based Registration System field application and administrative data sources. Information on attained education level by age and sex is available from this database.

National Education Statistics Database is updated every year by administrative registers compiled from Ministry of National Education, Council of Higher Education, Measuring, Selection and Placement Center and other institutions that provide information on education.

In this context, update study for 2017 has been finalized and statistics on attained education level for 2017 will be put to public use via Central Dissemination System (MEDAS) on TurkStat web site on 11/05/2018.

Announced to the public with respect.
