**PUBLIC ANNOUNCEMENT FOR REPORT ON
GROSS DOMESTIC PRODUCT BY PROVINCES, 2004-2017**

Regional accounts provide a detailed view of regional economies, regional distribution of national value added and regional differences, while national accounts provide information on the size, quality and development of the total economy in international standards. Turkish Statistical Institute has been releasing the results of the gross domestic product at regional level since 2004. By using these results, a report on " Gross Domestic Product by Provinces " which covers the years 2004-2017 and presents evaluations, analyzes and comparisons among the regions was prepared visually.

The relevant report can be reached from the adress below:
