BASE YEAR CHANGE OF CONSTRUCTION TURNOVER AND PRODUCTION INDICES

In order to reflect the structural economic developments in indices, base years are updated in the years ending with "0" and "5". Indices are calculated with new base year and methodologies. Therefore Short Term Business Statistics with base year 2005=100 are recalculated with new base year 2010=100.

Construction Turnover and Production Indices will be published seasonally and calendar adjusted for the first time.

Accordingly, Construction Turnover and Production Indices will be published on 4 July 2013.

Announced to public with respect.
